## Composters and Rain Barrels

### 2011 Order Form

Orders Due to the Kendall County SWCD

Order Pick-up Location: 7775A Route 47, Yorkville, Illinois 60560

**Tumbling Composters and Mini Tumbling Composters**—Yard waste and food scraps make up 20% - 30% of garbage!! By composting yard and kitchen waste, you send less garbage to landfills. Flowers, vegetables, trees, shrubs, house plants, lawns, and container gardens grow better in soil mixed with compost. Composting provides an almost constant source of free fertilizer and soil conditioner. Through regular use of compost you can greatly reduce the need for chemical fertilizers, pesticides and herbicides, which saves money and reduces contamination of our waterways and drinking water.

Our Composters are made from a black, recycled food grade barrel and are available in 2 sizes: 55 gallon barrel or a smaller 5 gallon barrel.

**Save the Rain for a Sunny Day!** By using *Rain Barrels*, you are benefiting the environment by reducing sewer runoff, helping your garden and landscape thrive, reducing your water bill, and reducing stress to the water supply. A rain barrel is a system that collects and stores rainwater from your roof. Only 1/4 inch of rainfall runoff from the average roof will completely fill the typical barrel. Because you are collecting it right off your roof, it has few contaminants and is perfect for watering gardens and flower pots.

These Rain Barrels are made from recycled food grade barrels and comes assembled with a spigot, linking fitting at the bottom end, overflow fitting near the top and a screen enclosure for the top. Rain Barrels are available in Black, Grey, Terra Cotta and Blue. Accessories may be available upon request.
